Subject Index of Volume 173

Abrasive wear
abrasive wear of alumina fibre-reinforced aluminium, 95
wear of tillage tools coated by thermoplastic coatings, 115
Additive
the influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives, 129
Additives
a study of the tribological properties of S-(1H-benzotriazol-1-yl)-methyl, 0,0′-dialkyldithiophosphates as additives in liquid paraffin, 167
Alumina
abrasive wear of alumina fibre-reinforced aluminium, 95
Aluminium
abrasive wear of alumina fibre-reinforced aluminium, 95

Bearings
a new strategy combining backward inference with forward inference in monitoring and diagnosing techniques for hydrodynamic bearing–rotor systems, 31
bearing misalignment effects on the hydrostatic and hydrodynamic behaviour of gears in fixed clearance end plates, 199

Ceramics
friction behaviour of TiN, CrN and (TiAl)N coatings, 13
Chemistry
mathematical and chemical description of friction of diffusive phosphorized iron, 51
Clearance end plates
bearing misalignment effects on the hydrostatic and hydrodynamic behaviour of gears in fixed clearance end plates, 199
Coated carbide tools
correlating tool wear, tool life, surface roughness and tool vibration in finish turning with coated carbide tools, 137
Coatings
friction behaviour of TiN, CrN and (TiAl)N coatings, 13
wear of tillage tools coated by thermoplastic coatings, 115
Compressibility
effects of lubricant compressibility on the film thickness in EHL line and circular contacts, 151
Contacts
the plane transient contact problem for rough sliding bodies with wear and heat generation, 39
Corrosion
phosphate ester surface treatment for reduced wear and corrosion protection, 207

Dry rolling–sliding
wear processes in high-strength sintered alloys under dry rolling–sliding, 121
Dry sliding wear
dry sliding wear and friction: laser-treated ductile iron, 21
Dynamic analysis
the dynamic analysis of stick–slip motion, 1

Electrical transmission lines
fretting fatigue in electrical transmission lines, 179

Fibre
abrasive wear of alumina fibre-reinforced aluminium, 95
Finish turning
correlating tool wear, tool life, surface roughness and tool vibration in finish turning with coated carbide tools, 137
Fitted assemblies
a study of the surface deformations in press and shrink fitted assemblies, 75
Fretting
fretting in orthopaedic implants: a review, 189
Fretting fatigue
fretting fatigue in electrical transmission lines, 179
Friction
friction behaviour of TiN, CrN and (TiAl)N coatings, 13
dry sliding wear and friction: laser-treated ductile iron, 21
mathematical and chemical description of friction of diffusive phosphorized iron, 51

Gears
bearing misalignment effects on the hydrostatic and hydrodynamic behaviour of gears in fixed clearance end plates, 199

Heat generation
the plane transient contact problem for rough sliding bodies with wear and heat generation, 39
High-speed steel
the role of hard second phases in the mild oxidational wear mechanism of high-speed steel-based materials, 105
Hydrodynamic lubrication
a new strategy combining backward inference with forward inference in monitoring and diagnosing techniques for hydrodynamic bearing–rotor systems, 31

Impact abrasion
the design of an impact abrasion testing machine, 59
Ion implantation
the influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives, 129
Iron
dry sliding wear and friction: laser-treated ductile iron, 21
mathematical and chemical description of friction of diffusive phosphorized iron, 51

Liquid paraffin
a study of the tribological properties of S-(1H-benzotriazol-1-yl)-methyl, 0,0′-dialkyldithiophosphates as additives in liquid paraffin, 167
Load bearing
a study of the surface deformations in press and shrink fitted assemblies, 75
Lubricants
effects of lubricant compressibility on the film thickness in EHL line and circular contacts, 151

Machining
experimental investigation of overall machining performance with overall progressive tool wear at different tool faces, 171
Mathematics
mathematical and chemical description of friction of diffusive phosphorized iron, 51
metal ion implantation
the enhancement of wear life and moisture resistance of sputtered MoS_2 films by metal ion implantation, 145
Mo
the influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives, 129
moisture resistance
the enhancement of wear life and moisture resistance of sputtered MoS_2 films by metal ion implantation, 145

Nitrides
friction behaviour of TiN, CrN and (TiAl)N coatings, 13

Orthopaedic implants
fretting in orthopaedic implants: a review, 189

Phosphate esters
phosphate ester surface treatment for reduced wear and corrosion protection, 207

R.f.-sputtered MoS_2 films
the enhancement of wear life and moisture resistance of sputtered MoS_2 films by metal ion implantation, 145
Rotors
a new strategy combining backward inference with forward inference in monitoring and diagnosing techniques for hydrodynamic bearing–rotor systems, 31
Roughness
the plane transient contact problem for rough sliding bodies with wear and heat generation, 39

Simulation
wear simulation of a sliding system by means of large-scale specimen testing, 65
Sintered alloys
wear processes in high-strength sintered alloys under dry rolling–sliding, 121
Sliding
the plane transient contact problem for rough sliding bodies with wear and heat generation, 39
wear simulation of a sliding system by means of large-scale specimen testing, 65
Squeeze–sliding lubrication
a simplified solution to the combined squeeze–sliding lubrication problem, 85
Statistical analysis
the design of an impact abrasion testing machine, 59
Stick–slip motion
the dynamic analysis of stick–slip motion, 1
Surface roughness
correlating tool wear, tool life, surface roughness and tool vibration in finish turning with coated carbide tools, 137
Surfaces
a study of the surface deformations in press and shrink fitted assemblies, 75
Surface treatment
phosphate ester surface treatment for reduced wear and corrosion protection, 207

Tillage
wear of tillage tools coated by thermoplastic coatings, 115
Tools
wear of tillage tools coated by thermoplastic coatings, 115
Tool wear
correlating tool wear, tool life, surface roughness and tool vibration in finish turning with coated carbide tools, 137
experimental investigation of overall machining performance with overall progressive tool wear at different tool faces, 171
Tribochemical reaction
the influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives, 129
Tribological properties
a study of the tribological properties of S-(1H-benzotriazol-1-yl)-methyl, 0,0′-dialkyldithiophosphates as additives in liquid paraffin, 167

Unlubricated wear
the role of hard second phases in the mild oxidational wear mechanism of high-speed steel-based materials, 105

Wear
the influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives, 129
phosphate ester surface treatment for reduced wear and corrosion protection, 207
Wear life
the enhancement of wear life and moisture resistance of sputtered MoS_2 films by metal ion implantation, 145
